

“We Do” Customization Notes

The editable text on this card design can be changed to any font style installed on your computer. If you would like to use a font similar to the "We Do" artwork, it has been created using the font "Bickham Script." We also recommend the fonts "Times New Roman" and "Trajan" for coordinating font combinations.

In the Page Styles tab, there are some pre-made color combinations to choose from. To switch between each of them, drag and drop a design from the Page Styles tab onto the page (near the bottom of your screen).

CUSTOM COLORS:

You can custom mix colors to change the "We Do" artwork, text and background colors. Unfortunately we cannot guarantee an exact color match to a particular color. We strongly suggest ordering a proof before ordering all invitations when concerned about color matching.

TO CHANGE THE COLOR OF THE "WE DO" ARTWORK:

- 1. Click on the "We Do" artwork on the page to select it.*
- 2. Click on the  Object Properties Tool icon in upper right corner of your screen. (This icon has a green circle and pink rectangle on it.)*
- 3. In the Object Properties Tool palette, click on the "Colour" square to bring up a limited color palette menu. Choose "other" from the menu to mix a custom color. Be sure to document the color values for your custom colors for future use.*

TO CHANGE THE BACKGROUND COLOR ON A PAGE:

- 1. Click on the  Page Background Tool icon in upper right corner of your screen. (This icon looks like a blank white page.)*
- 2. Click on the "Colour" square to bring up a limited color palette menu. Choose "other" to mix a custom color. Be sure to document the color values for your custom colors for future use.*

TO EDIT TEXT CONTENT AND FONT STYLE, COLOR ETC...

1. *Double-click on the text box which contains the text you would like to edit. A blinking cursor will appear in the text box.*
2. *Use your mouse to click and select / highlight existing text to change.*
3. *On the right side of screen, under the "T" toolbar, change the font attributes of the selected text such as font, size, color and paragraph spacing.*

BY DEFAULT, THIS INVITATION IS A ONE-SIDED CARD.

You may add an additional (back) side to this project to include additional details, a picture, a pattern or solid color back at an additional cost.

Important: Only add a page if you intend to customize it. Adding a page will convert your project into a two-sided card and additional fees will be added to your order regardless of the design -- even if you leave it blank.

(For more information about pricing, visit www.focusinpix.com)

TO ADD A BACK SIDE TO THIS PROJECT:

1. **Add a page.** *In the menu near the top of your screen, select Page > Add. This will add a blank page to your project. This page will be printed on the reverse side of the first page.*

Please note that any page you add to this project will be printed on the back side of the first page.

If you need to add a separate printed piece, begin a separate project.

ABOUT PATTERNED BACKGROUNDS FOR BACK SIDE

By default, the "Chevron Pattern" has been added onto the patterned background Page Styles available. There are more patterns available in the "Backgrounds" tab. (The "Backgrounds" tab is located near the bottom of the screen).

TO CHANGE TO A DIFFERENT PATTERN:

First select a "Chevron" page style, then change the patterned image overlay:

- 1. Make sure you have added a second page to your project.*
- 2. Select the newly added page. (Click on the new page in the upper tray of your project to select it)*
- 3. Click on the "Page Styles" tab near the bottom of your page. Scroll to the right to find the chevron patterned "Back (optional)" page styles.*
- 4. Drag and drop one of the "Chevron Pattern" page styles onto your page. (Note: select a color choice to match or coordinate with the front of your card).*
- 5. Click on the "Backgrounds" tab, then scroll to the right to find the different patterned images. (Patterned backgrounds will be labeled with the word "pattern" within the name)*
- 6. Drag-and drop a selected pattern background onto the colored background to change the pattern.*

You can create your own custom colored background on your page. To create a custom color background, select the background icon in upper right corner of screen. (This icon looks like a blank page.) Then click on the "Colour" square to mix a custom color.
